**Units previously inspected/repaired are no longer part of this recall.**

Boxed generators are identified by a "green dot" located on the carton.

Also, one of the markings shown to the right, located inside the spark plug access cover.

**Consumers should immediately stop using the recalled generator and contact a Honda Power Equipment dealer to have it inspected/repaired free of charge.**

### ***What is the problem?***

A tube clamp that connects a fuel tube to the bottom of the fuel tank may have been improperly positioned during assembly, and use of the generator may cause the clamp to wear a hole into an adjacent fuel tube. **If the fuel tube is worn sufficiently, gasoline and gasoline vapors may leak out and a fire or explosion could occur.**

### ***What should you do?***

Stop using any generator within the affected serial number range until it has been repaired. Please contact a servicing Honda Power Equipment dealer to make an appointment to have your generator inspected and if necessary repaired, free of charge. If you need assistance locating a servicing dealer, please visit our website: [www.PowerEquipment.Honda.com](http://www.PowerEquipment.Honda.com), or call us at our recall line (888) 888-3139.
